Overview

The City of Fergus Falls is undertaking a continuation of the Downtown Riverfront Improvements Project in the parking lot east of the market pavilion. This project includes the construction of a splash pad, restroom, decorative concrete, utilities, and landscaping that is meant to continue the ideas behind the market pavilion project and create additional public spaces.

Update

Helical piles have been installed along with most of the foundations for the various structures. Atop the foundations, the retaining wall is being constructed and the exterior walls for the restroom building have been completed. Also, the water tank for the splash pad has been set.

Over the next few weeks, crews will finish the foundations and retaining wall. The photo below shows the stone-like texture of the concrete form. Once foundations and the retaining wall are completed, crews will be on site to install all storm and sanitary sewer, along with all the plumbing and watermain required for the splash pad system. During that process, another crew will be working on completing the restroom building.

Contacts

Ben Graupman will be on site throughout the project and will serve as the primary contact during construction. Ben can be reached at (507)-720-1523 or Ben.Graupman@bolton-menk.com. Newsletters, such as this one, will be posted to the city website throughout the summer. If you have questions or concerns at any time, please contact Ben at the number or email address listed.
