

# Native Planting Landscape Plan

**Prior to submitting this plan, please review all requirements related to native plantings available at <https://www.fergusfallsmn.gov/government/boards-commissions/mayor-s-natural-resources-advisory-committee>**

Provide a sketch of native planting location on property in the space below. Please make sure it includes the following:

- Dimensions of the planting area
- Distance from edge of planting to nearby roads
- Location and type of edging that will be used
- Location of native planting sign (if required)

Name:

Address:

Contact information:

List what species of native plants will be used (use back of page if necessary). If purchasing a seed mix, attach a copy of the seed mix or list the name of the company where the seed was purchased and seed mix name.

If the planting is on sloped ground, describe what will be done to prevent erosion. Consider options like using a cover crop or installing an erosion control blanket.

If the planting is in a location likely to be seen by the public, you are required to install a sign informing others that a native planting is being established. Please list what your sign will say and what the dimensions of the sign will be.

*Note: If you are not the property owner, please include a signed letter from the property owner that acknowledges they are aware of and have approved the project.*
